Regarding: Charles Grace, FPPC No. 20/416

To Whom It May Concern,

It is appalling that a few individuals have brought false information against Charles Grace trying to destroy all the goodness he has provided for the San Simeon Community. If they are so disappointed in all the improvements over the many years of excellent management, maybe it is time for them to move on to another area where they will be satisfied and quit harassing a hard working leader, Charles Grace.

My husband Terry Lambeth and myself moved from Morro Bay to San Simeon and fell in love with the community. Terry served on the SSCSD for many years and Charles Grace was the best thing that ever happened to our little town. We had many evenings of great discussions regarding what the community needed. Charles was always ready to take on any challenge that was set in front of him. There were no problems, only solutions which he came up with and executed. We went from having restrictions on our water use to the most up to date system that allowed for gray water so we could continue to do something as simple as watering a potted plant and keeping our community looking the best it could. Charles was tireless and had a great worth ethic. I am very sad that anyone even challenged his integrity. I believe if you took a good look at what he accomplished you would understand how hard he worked at making San Simeon the best it could be. Never did he do anything to benefit himself, only what was needed for our community.

In my opinion, Karina Tiwana and Hank Krzculk should be billed for the attorney fees Charles Grace personally incurred along with a counter suit against them for trying to defame his name.

If you have any questions or would like any further information I might be able to provide, please feel free to contact me.

With Aloha,

Maren Lambeth
