## EXTERNAL EMAIL

Hello,

Please reconsider the requirement of 87200 filers to file electronically directly to the FPPC. One of the main reasons we decided to utilize software for Form 700s was because of the integration between our systems. Having a system in place for cities to use a software and have it work directly with FPPCs system is easy-to-use and intuitive for filing officers and filers. Our filers have been filing in our system since we have used this software, and to require them (arguably the most important filers) to learn another system when the current system works perfectly fine, is a mistake.

Thank you!
